

Open Entry Courses have open start dates. Students may register for these classes anytime throughout the semester and the coursework can be completed anytime during that semester as long as it is done before the semester ends. The advantage to open entry classes is that once a student

finishes one class they can start another within the same semester. All coursework must be completed by the end of the semester. Open Entry Courses offer the opportunity to speed up the time in which a certificate or degree can be earned as long as the student passes all the required classes.
